

How a Kovrent deal is structured

Majority cash at close. The price you can count.

Rollover equity in the holding company, valued in writing.

Earnouts only where the founder keeps the levers. Mostly we avoid them.

A seller note only when the founder prefers it.

Your name stays on the door. Your team keeps their seats.

Transition on your timeline: one year or five, set in the deal.

Permanent capital. We hold what we buy.
